## SKREI

### A North Sea Treasure from the Lofoten Islands

Skrei is a special type of winter cod, considered one of the North Sea's treasures due to its unique migration from the Barents Sea to the Lofoten Islands. This migratory fish travels impressive distances to spawn in the clear waters off the Norwegian coast. The result is a low-fat fish of exceptional quality with firm, white flesh and a delicate flavour.

### Sustainable Fish and Environmental Protection

Sustainability is at the heart of our Skrei operations. Our partner fisheries only use traditional, environmentally friendly fishing methods to ensure that Skrei stocks are maintained in Arctic waters. We actively support initiatives to preserve marine ecosystems and respect the environment in which Skrei thrives.

- ✓ Wild cod from the Arctic
- ✓ Environmentally friendly fishing methods
- ✓ Freshness and authenticity
